ASCE | International Conference on Sustainable Infrastructure 2021

Virtual Event | December 6-10, 2021

Leveraging Sustainable Infrastructure for Resilient Communities

The International Conference on Sustainable Infrastructure (ICSI) 2021 is now virtual...

...and the call for submissions is open!

ICSI 2021 will provide an environment to present, discuss, and leverage current insights in the planning and development of resilient and sustainable communities globally.

Conference content will promote collaboration with a wide diversity of stakeholders that are impacted by global infrastructure challenges and opportunities associated with creating sustainable and resilient communities.

Relevant themes and topics:

- Community Resiliency in the Face of Climate Change
- Disaster Mitigation and Recovery
- Disruptive Innovations
- Education, Workforce Diversity, and Outreach
- Energy Supplies and Distribution
- Equity and Social Justice
- Infrastructure Financing and Management
- Public Health and Recovery from Pandemics
- Public Policy
- Social Impact and Stakeholder Engagement
- Supply Chain
- Sustainable Technologies, Materials, and Designs
- Urbanization

Submission types

The program committee encourages content in a variety of formats, including:

- Individual presentation (10-15 minutes)
- Panel (4-5 speakers and a moderator to discuss a central topic: 90 minutes)
- Full session (4-5 individual presentations and moderator: 90 minutes)
- Hot Topic (30-minute talk with a 15-minute discussion)
- Poster (.PDF or other format to be determined; available on conference platform 24 hours)
- Other Activity or Format

Important Dates

Initial submissions due: March 1, 2021
Final abstracts and optional papers due: May 21, 2021
Conference dates: December 6-10, 2021
Special Collection of ICSI papers available: January 2022
