ENVISION™

INTRODUCING THE NEW

ENVISION SUPPLIER DIRECTORY

A searchable database where vendors can showcase their sustainable solutions to infrastructure project teams.

The Envision Supplier Directory will assist public agencies, design teams, contractors, and other infrastructure decision-makers in identifying materials, products, services, and technologies that can help solve specific sustainability challenges on projects.

Each listing in the directory includes the name of a sustainability-related material or service with a description, supporting documents, and contact information. Suppliers must also associate their offerings with specific credits in the Envision framework.

By tying their solutions to Envision in the directory, suppliers engage with a rating system that is increasingly well recognized across the infrastructure community.

All listings in the directory are linked to specific credits within Envision, tying suppliers to the industry's leading sustainable infrastructure system.

Envision is a holistic consensus-based framework and rating system that guides and assesses the sustainability, resilience, and equity of all types of civil infrastructure.

It is a comprehensive tool that can assist private and public agencies and their consultants and contractors in delivering infrastructure that tackles climate change, addresses public health needs, supports environmental justice, creates jobs, and spurs economic development.

Strong growth is forecast for Envision usage with the increasing global focus on sustainability and resiliency in the built environment.

13 years of Envision growth, has resulted in:

- **10,000+** Envision Sustainability Professionals (ENV SPs)
- **400+** Projects in the Envision Program – valued at more than USD \$280B

As of March 2025

BENEFITS

A resource to connect project teams with suppliers providing materials and services aligned with Envision.

Infrastructure renewal holds great promise, with rapid advances seen on diverse projects tackling a range of sustainability goals. But different goals, expectations, and trade-offs often introduce complexity in selecting suppliers.

The Envision Supplier Directory provides an opportunity to educate owners, consultants, and contractors about specific materials or services that can support a project's sustainability goals and potentially improve sustainable performance. It is intended to:

1. Offer an opportunity for suppliers to highlight their sustainable products and services for an audience that is seeking sustainable solutions.
2. Provide a resource for project teams looking to identify materials, products, services, and technologies that can help solve specific sustainability challenges.

WHO CAN BECOME A SUPPLIER?*

Any organization that manufactures and/or supplies sustainable solutions, materials, and/or services can purchase listings in the directory.

* View [pricing information](#) later in this brochure

Awareness

Join a unique community that includes thousands of infrastructure professionals and 100,000+ annual website visitors seeking training, verification, and membership.

Network Expansion

Increase your profile with the industry and help expand your network by connecting with ISI's existing network of infrastructure owners, consultants, and contractors.

Competitive Advantage

Educate owners, consultants, and contractors about specific materials and services that can support their project's sustainability goals and potentially drive improved sustainable performance.

Catalyst for Change

Support AEC industry professionals who are directly engaged in creating more sustainable, resilient, and equitable civil infrastructure using Envision.

If you know sustainable infrastructure, you know Envision!

The Directory provides the opportunity for suppliers to become part of a thriving community covering all infrastructure segments and project types.

Envision-verified projects span all infrastructure sectors: Transportation, Water, Energy, Information, Waste, and Land/Environmental.

1. RapidRide H Line, King County, WA (Platinum v3, 2024) 2. Dixon Wastewater Treatment Facility, Dixon, CA (Silver v2, 2017) 3. Azure Sky Solar, Dallas-Fort Worth, TX (Gold v3, 2024) 4. Surrey Biofuel Facility, Surrey, BC (Platinum v2, 2018) 5. Lower Manhattan Coastal Resiliency - The Battery, New York, NY (Platinum v3, 2024) 6. Oxford Retention Basin Multi-use Enhancement Project, Los Angeles, CA (Platinum v2, 2021)

Suppliers, of course, have been essential contributors on all of these projects, providing solutions to address specific sustainability challenges, although ISI has not explicitly recognized those supplier contributions — until now, with the Envision Supplier Directory.

A DIRECTORY FOR... MATERIALS PROVIDERS

The sustainability requirements and expectations of the infrastructure sector are ever-changing. Whether it's to source more resilient materials or identify better options for services, owners, consultants, and contractors are keeping a watchful eye on the marketplace to deliver the best projects.

The Envision Supplier Directory recognizes that project teams are looking for materials that:

- Are energy and/or water efficient
- Include recycled content
- Support a circular economy
- Reduce embodied carbon
- Are cost-effective
- Are certified by a third-party sustainability program
- Align with sustainable procurement policies and practices
- Reduce waste
- Are innovative
- Contribute to improved public health and safety outcomes

Adding a listing in the directory is straightforward — suppliers can create one right from their ISI dashboard.

Any company that offers a sustainability-related service or material can apply to become a supplier in the directory, and here are some initial considerations:

1. If you are the administrator at a member company, login to your account to view the complimentary listings available to you. You can now begin the process of creating a listing. You can also view the options to purchase additional listings.
2. If you are the admin of an organization that has a complimentary membership with ISI (non-member), log in and view the options to upgrade your membership to take advantage of the supplier program. Different tiers of membership are available based on firm size.
3. If you do not have an account with ISI, you will need to create a free account. From there, view membership tier options in your dashboard and select one in order to become a supplier. There are some fantastic benefits to ISI membership to consider, but if you decide that membership is not for you, we understand. You still have the option of purchasing supplier listings, without becoming an ISI member.

Each supplier will be asked watch an introductory training video covering the technical aspects of creating a listing and introducing the Envision framework.

A DIRECTORY FOR... SERVICE PROVIDERS

The Envision Supplier Directory is also a response to the need of infrastructure owners to find companies that support their sustainability efforts with services, such as:

- Envision facilitation
- Sustainability-oriented training, education, and capacity-building
- Climate change mitigation and adaptation planning
- Life-cycle assessments
- Triple bottom line cost-benefit analyses
- Stakeholder engagement services
- Waste management
- Land-use planning
- Landscape architecture
- Sustainable design services
- Geotechnical services
- Environmental impact assessments

Matching Solutions to Envision Credits

For a product or service to be listed, it must be linked with at least one credit in Envision. The directory training referred to earlier includes a built-in reference for every Envision credit. There are 64 of them in all, each addressing a sustainability indicator pertinent to infrastructure. Credits are divided across 5 overarching credit categories:

Quality of Life: Protecting and growing strong communities

Leadership: Committing to sustainability, collaboration, and planning

Resource Allocation: Conserving materials, energy, and water

Natural World: Preserving the environment and natural systems

Climate and Resilience: Mitigating climate change and developing more resilient communities

Limitation

The Directory supports expanded Envision awareness and use throughout the infrastructure supply chain. A training video for organizations looking to become suppliers is included as part of the Directory on-boarding process. A listing cannot guarantee outcomes that suggest Envision award levels or an Envision total score. A company's inclusion in this directory will not impact the independent, third-party verification process. The inclusion of a service or material in the directory does not constitute an endorsement or certification by ISI, or signify confirmation of sustainability attributes.

COMPLETING A LISTING IS STRAIGHTFORWARD

Submitting a listing involves the following steps:

- 1. Company info** (*prefilled based on your ISI profile, but editable*)
 - Listing type – Material / Service
- 2. Listing info**
 - Material name and type
 - Service regions
 - Certifications and Awards, Marketing and Technical Material (*optional*)
- 3. Description**
 - Detailed description
 - Sustainability outcomes
- 4. Envision Related Items**
 - Envision related credits
- 5. Details**
 - Header photo
 - Public Point of Contact information and website
- 6. Confirmation**

Upon submission, the listing goes through a review process. Approved listings are added to the public-facing Directory. Disapproved listings can be edited and resubmitted.

Every material supplier must also answer the following questions with each of their listings:

1. Do you have an environmental management system in place that is consistent with ISO 14001?
2. Do you have an Environmental Product Declaration (EPD) for your offering?
3. Does your company produce an annual corporate sustainability report consistent with the Global Reporting Initiative (GRI) or equivalent?
4. Is your offering third-party certified, for example by the Forest Stewardship Council (FSC), Green Seal, Underwriters Laboratories (UL) ECOLOGO® Certification, National Biosolids Partnership (NBP), Concrete Sustainability Council (CSC), or other?

ADDING YOUR LISTING:

ISI DASHBOARD

See *Envision Supplier Directory User Guide* for details

The ISI Dashboard form is divided into several sections:

- Name of Material:** A text input field.
- Type:** A dropdown menu with "Select" as the current option.
- Marketing Material Name:** An optional field with a text input and a "Remove" button.
- Marketing Material:** A PDF upload section showing a file named "Marketing Material.pdf" (2.91 MB) with "Add Another" and "Delete" buttons.
- Envision Related Credits:** A section with a "Select" dropdown and a list of credits: QL1.1 Improve Community Quality of Life, QL1.2 Enhance Public Health & Safety, QL1.3 Improve Construction Safety, QL1.4 Minimize Noise & Vibration, QL1.5 Minimize Light Pollution, QL1.6 Minimize Construction Impacts, and QL2.1 Improve Community Mobility & Access.
- Do you have an environmental management system in place that is consistent with ISO 14001?** (Yes/No)
- Do you have an Environmental Product Declaration (EPD) for your offering?** (Yes/No)
- Does your company produce an annual corporate sustainability report consistent with the Global Reporting Initiative (GRI) or equivalent?** (Yes/No)
- Is your offering third-party certified, for example by the Forest Stewardship Council (FSC), Green Seal, EcoLogo, Underwriters Laboratories (UL), National Biosolids Partnership (NBP), Concrete Sustainability Council (CSC), or other?** (Yes/No)
- Public Point of Contact:** A section for "Full Name" (John Smith) and "0/255 symbols".
- Contact Information:** A label for the "Name and type of sustainability-related material or service".
- Images and documents:** A section for uploading images and documents.
- Related Envision credits:** A section with icons for various credits: People, Building, Recycle, Leaf, and Globe.

SUPPLIER DIRECTORY

The Envision Supplier Directory is a searchable database of suppliers. It features a search bar at the top with filters for "Products" and "Service". Below the search bar, there are several cards for different suppliers, each with a header image, a title, a description, and a list of related credits. The cards include:

- Business Name - Carbon neutral ready-mix concrete:** Business is a leading construction materials supplier with a focus on providing sustainable solutions to our customers. This me... Credits: BA1.1, BA1.2, CH1.1, CH1.2
- ABC Supplier - Products:** ABC Supplier is the largest products company in the United States, with distribution strategically located across the country to quickly respond... Credits: BA1.1, BA1.2, BA2.1, BA2.3, CH1.1, CH1.2
- ACME Sustainable Products - Synthetic Fibers:** ACME Sustainable synthetic fibers are used to replace conventional steel reinforcement or steel fiber in concrete applications. These include... Credits: BA1.1, CH1.1, CH1.2
- Consulting Co. Advisory Services:** Consulting Co. provides expertise in project and program assurance across infrastructure sectors. We have worked in policy development, strategic... Credits: QL1.1, QL1.3, LD2.1, LD2.2, LD3.1, LD3.2, LD3.3
- Power Solutions:** Power Solutions provides the next generation of far-future innovative, efficient, reliable, and sustainable power and lighting. We provide sh... Credits: BA2.2, BA3.3
- Risk Assessment Services:** CC Partners has experienced climate change and resilience practitioners to assist clients in understanding the potential shocks and stress... Credits: CH1.2, CH2.2, CH2.3, CH2.4, CH2.5

LD2.1 Establish a Sustainability Management Plan

A sustainability management plan enables an organization to set goals, objectives, and policies; integrate plans and programs; review performance against a plan; and take corrective actions across the full dimensions of sustainability.

Infrastructure owners, design teams, and their contractors are sourcing new suppliers with sustainability in mind. Suppliers who can help them address sustainability challenges will want to capitalize on the marketing and awareness-building potential of the Envision Supplier Directory.

Pricing

Members of ISI who pay an annual membership fee receive complimentary listings based on their membership tier. For example, member companies with 50 employees or fewer who pay a yearly membership fee of \$500 receive one free listing in the Envision Supplier Directory. Additional listings may be purchased at a reduced member rate. The table below presents the membership tiers and the corresponding number of listings in the Envision Supplier Directory.

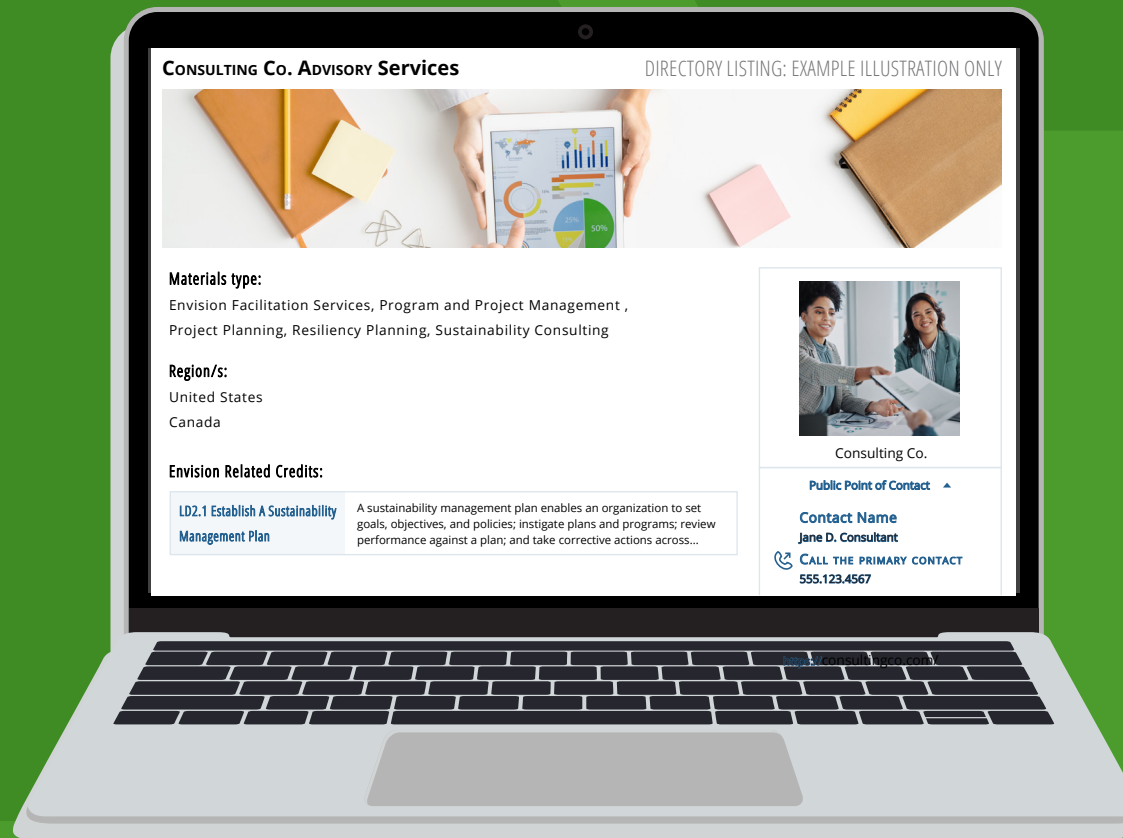

The opportunity to add listings to the Directory is available to firms that offer sustainability-related solutions or materials, but do not currently have a free ISI account. Firms can either purchase a membership to access corresponding listings, or remain a non-member and pay the Supplier Non-member listing price.

Membership Tier	Member (\$USD)	Supplier Non-Member (\$USD)	Listings
1) <50 employees	\$500	\$700	1
2) 50-99 employees	\$1,500	\$2,100	2-3
3) 100-500 employees	\$2,500	\$3,500	4-5
4) >500 employees	\$3,500	\$4,900	6-7
Additional listings	\$500 per Listing	\$700 per Listing	>7

Suppliers in the directory gain visibility with a key audience: professionals in the AEC industry who are on the front lines in helping to drive sustainable civil infrastructure with Envision.

THE ENVISION SUPPLIER DIRECTORY

Use Envision on your sustainability journey — become a supplier on ISI's website today!

www.sustainableinfrastructure.org

The Institute for Sustainable Infrastructure is an education and research nonprofit (a 501c3) based in Washington DC. It was established in 2010 by the American Public Works Association (APWA), the American Society of Civil Engineers (ASCE), and the American Council of Engineering Companies (ACEC). Responding to the need for a comprehensive sustainability framework and rating system suitable for use in civil infrastructure development, ISI collaborated with the then Zofnass Program for Sustainable Infrastructure at the Harvard University Graduate School of Design to develop Envision.
