

WHY TRAIN YOUR TEAM AS ENV SPS?

Build the knowledge your infrastructure projects need.

Infrastructure projects today are increasingly expected to demonstrate sustainability, resilience, and long-term value. Meeting those expectations requires more than technical expertise—it requires a shared understanding of how sustainable infrastructure principles can be applied throughout the project lifecycle.

An Envision-capable team is one in which project managers, engineers, planners, environmental professionals, construction staff, and other stakeholders share a common framework for making infrastructure decisions. Training multiple staff members as Envision Sustainability Professionals (ENV SPS) helps organizations build internal expertise, strengthen collaboration across disciplines, and integrate sustainability into everyday project delivery.

The strongest organizations don't rely on a single sustainability champion, they build teams with a common language, shared knowledge, and the ability to apply sustainability and resilience principles across projects.

Who Should Participate?

ENV SP Training is valuable for professionals involved in:

- Engineering
- Planning
- Public Works
- Transportation
- Water and wastewater
- Sustainability
- Environmental services
- Construction
- Asset management
- Parks and natural resources
- Capital project delivery
- Project management
- Sustainability and resilience-related academic programs

What Your Organization Gains

A COMMON FRAMEWORK FOR DECISION-MAKING

ENV SPS learn a consistent approach for evaluating sustainability and resilience across planning, design, construction, and operations, helping multidisciplinary teams collaborate more effectively.

BETTER PROJECT OUTCOMES

Applying Envision principles can help teams identify opportunities to:

- Improve long-term infrastructure performance
- Reduce project risks
- Enhance resilience
- Consider lifecycle costs
- Strengthen community outcomes
- Support environmental stewardship

GREATER ORGANIZATIONAL CAPACITY

Training multiple staff members builds institutional knowledge rather than relying on a single subject matter expert. Teams can apply what they learn across multiple projects and departments.

PROFESSIONAL DEVELOPMENT

The ENV SP credential demonstrates a commitment to sustainable infrastructure and provides staff with practical knowledge they can begin applying immediately.

Why Train Multiple People?

Organizations realize the greatest value when Envision knowledge is distributed across departments.

A team with shared knowledge can:

- Speak a common sustainability language
- Apply Envision principles consistently across projects
- Collaborate more effectively across departments
- Integrate sustainability into day-to-day decision-making
- Reduce dependence on a single internal champion
- Sustain institutional knowledge as staff roles evolve

Why Choose the Online Course?

- Learn at your own pace
- No travel required
- Fits around project schedules
- Accessible from anywhere
- Move directly to the ENV SP credential exam

Ways Your Team Can Apply What They Learn

ENV SP knowledge can support:

- Capital planning
- Project scoping
- Design reviews
- Alternatives analysis
- Risk discussions
- Resilience planning
- Stakeholder engagement
- Construction planning
- Asset management
- Continuous improvement initiatives

Signs Your Organization Is Ready

You may benefit from building an Envision-capable team if you:

- Deliver capital infrastructure projects
- Have sustainability or resilience goals
- Are integrating climate considerations into planning
- Want a common framework across departments
- Are investing in workforce development
- Want to strengthen collaboration among project teams

Take the First Step

Building organizational capability starts with a small group of trained professionals who can apply a common framework across projects and share their knowledge with others.

The ENV SP Online Training provides a flexible, self-paced way to begin building that capability—helping your organization make more informed, sustainable infrastructure decisions today and into the future.

LIMITED-TIME OPPORTUNITY

Available August 10-September 18, 2026

For six weeks only, the Online ENV SP Training is available at **50% off**. This limited-time offer provides an affordable opportunity to expand your organization's sustainable infrastructure expertise.
